

# US 24 at Minturn Roadway Improvements

## Project Update: October 18, 2019

With milling wrapping up this week, ACC will be ready to pave starting next Tuesday, October 22. Paving will require lane closures of approximately 1/2 mile with alternating traffic in the opposing lane at the direction of a flagger. It will also limit parking along US-24 during work hours.

**Please note:** The VMS boards (variable message signs) and traffic control devices will indicate when/where parking is prohibited. If a vehicle is parked where paving is to occur it will be towed at the owners expense so it does not impede paving operations. Stay alert to construction signage.

Crews will continue to knock down curb and gutter work between Toledo and Meek. ACC will provide 24-hour notice if this work will prevent access/egress to your property. Please look for a notification on your door if you live in this area.

The forecast indicates winter weather conditions this weekend which may limit Sunday work. Next week crews will be working Monday - Saturday 7 am - 6:30 pm. Weekday traffic control will not begin until after 9 a.m. ACC may also shift traffic in certain areas so please stay alert and watch for the directional cones during work hours.
